## **The World's Friendliest Straws**

Save the sea life: Reduce your use of single-use plastics and choose a straw that lasts!

*Ditch the dissolving paper straw and bring eco-friendliness wherever you go.*

## **Why Mahalo Straws?**

### **Plastic Straws Harm Our Oceans**

People use 500 million plastic straws every day, and many of them end up in the ocean or on our beaches, where they can hurt or kill marine animals. By skipping the plastic straw, you can help save the planet.

### **Paper Straws Suck — Or Rather, They Don't!**

Paper straws were supposed to solve the problem of plastic ones. But let's face it: Paper straws are gross. They collapse on themselves and dissolve in your drink. A Mahalo Straw lasts for THOUSANDS of drinks, not just half of one.

### **Mahalo Straws are the Future**

The Mahalo Straw is a collapsible metal straw that lasts for years. Do your part to protect our marine life: Reduce your waste with the guilt-free straw that goes with you everywhere.

## **Features of the Mahalo Straw**

### **Compact, Convenient, and Easy to Clean**

The Mahalo Straw is a telescoping stainless steel straw in a convenient carrying case that easily fits in your pocket or clips onto your drink bottle. Whether you're at home, the office, a restaurant or bar, camping, traveling, or shopping, you'll be prepared to help save the planet.

### **Get your Drink On, Guilt-Free**

Instantly deploy and store this easy, compact straw. Each Mahalo Straw comes with a cleaning brush and takes mere seconds to use, clean, and pack away for your next drink.
